2. Citations and explanations (Rule 70.7)			
<p>1. Owing to the unchanging presence of a chlorine atom in the educt and product of the key reaction as well as to the composition of the steps, the claimed method for producing an enantiomerically pure amino alcohol is regarded as novel.</p>			
<p>2. In view of the fact that the by-product of formula 5 surprisingly no longer has to be separated in a manner requiring considerable outlay by subjecting product 4 to chromatography, but rather can easily be removed in step iv during the reaction with methyl amine, the provision of the claimed overall method is regarded as involving an inventive step.</p>
